

Wisdom Café – Modern Inventions

March 1, 2023

Which modern inventions changed your life? TV, cell phone, computer, FB, electric refrigeration, eBooks microwave, or something else?

Let's reflect how far technology has come and how different our lives are today with it!

- I believe technology is very good but has also had some negative impacts on us.
- Technology is fabulous, but I see it impacting family relationships in a negative way.
- Technology has made life so much easier.
- Technology has made it less expensive and easier to contact relatives in other countries.
- Technology has offered a way for immigrants to connect with each other.
- Technology has provided a way to make international phone call easier and less expensive.
- While our infrastructure is very good in the US, other countries still suffer.
- Facetime technology has given me the opportunity to see my granddaughter in DC, in real time every day at 3:30.
- Computers have definitely made my life easier.
- Technology has improved from typewriters to keyboards.
- Self publishing has moved our lives forward.
- Technology means different things to different people. For example, for a child, it means Facebook and Tic Tok. For a mother it means a dishwasher and a microwave. For a grandmother it means running water.
- GPS and the internet have greatly improved our lives.
- The microwave is a wonderful invention.
- Transistor is the key to everything.
- Although technology is good, it also has negatively impacted our connectivity to others.
- Airplanes changed my life
- The advantage of age is prospective. The production and use of fossil fuels is an example. Climate change will affect the world, especially in places like Africa. Deforesting is important to habitat and will impact our future.
- Technology impacted our lives during COVID. ie- grocery delivered to our homes and zoom meetings.
- Medical technology has affected our lives.
- The technology of a colonoscopy has ultimately prolonged human life.
